How to install arctic king portable air conditioner

iStock The sweltering heat of the summer months is a good reminder of the value of an air conditioning unit. In parts of the country such as Las Vegas, Phoenix and Arizona, summer highs can reach over 100 degrees Fahrenheit. On the other side, parts of the North-East and the Midwest experience biting cold in the winter. This makes it necessary to install a robust air conditioner unit to balance out the extremes.Air conditioner units come in portable as well as fixed versions. A portable air conditioner can stand in a small space inside the house and typically runs on electricity. Fixed style air conditioners are larger and will cost more.You can get air conditioner units for the home starting from around \$250 for portable units, and \$500-\$5000 for wall mounted air conditioners.Reputable Air Conditioner BrandsBuying a brand name air conditioner gives you the peace of mind that the product will last. This is critical when buying an air conditioner since you will need its services for a long time. You want a unit that will last for years without frequent breakdowns.GE is a market-leading brand when it comes to air conditioners. It leads in the category for window-installed air conditioners. Some of its models include the GE AEC08LW, GE AEZ08LV, and GE AHM05LW. Another leading air conditioner brand to consider is LG. LG makes high-quality consumer electronics, including everything from TVs to home air conditioning units. The LG LW8016ER and LG LW6016R are some of the air conditioners available from LG. LG air conditioners will cost around \$150-\$500 for window units.Other brands like Kenmore and Frigidaire also offer great value when it comes to air conditioning. The Best Ranked Home Air ConditionerMany established brands sell quality air conditioners. Some of these include LG, GE, Amana, and others. However, another brand stands out for offering the best components and builds when it comes to air conditioning systems. That company is Goodman. Goodman is one of the best brands in the market and has been tried in some of the toughest markets around the country. Customers in heat pockets such as Arizona and Texas have come to rely on Goodman's ability to keep their homes cool during the scorching summer heat. Goodman has a solid reputation for its business practices and has also won numerous industry awards.For most homes, units like Goodman's GSXC16/DSXC16 or the even more powerful GSXC18/DSXC18 will do a thorough cooling job. The GSXC18/DSXC18 operates very efficiently, with a Seasonal Energy Efficiency Rating (SEER Rating) of 18. This indicates very efficient cooling capabilities, making it an ideal choice for the home. Best Overall Portable Air Conditioner BrandA portable air conditioner is adequate for small houses and large rooms. It costs less than a central air conditioning unit and can be relocated around the house depending on where it's needed most.Honeywell is one of the best brands to consider when shopping for a portable air conditioner. The company has highly efficient portable air conditioners such as:Honeywell MN10CESWW 10,000 BTU Portable Air Conditioner - Costs around \$400 Honeywell MM14CCS 14,000 BTU Portable Air Conditioner - Costs around \$500 These are very powerful units that will keep the house cool even on very hot days.Carrier Air ConditionersCarrier has some of the most powerful air conditioners on the market. The company's high-end models have very high SEER ratings. Running a Carrier unit means that you will save money on cooling costs over the course of the year.Carrier's high-end air conditioners are available from major suppliers at these approximate prices:Infinity 24ANB1 21 SEER - Costs around \$4,000 Infinity 24ANB7 17 SEER - Costs around \$2,600 Performance 24ACB7 17 SEER - Costs around \$2,400 Performance 24ACC6 16 SEER - Costs around \$2,300 With a solid industry reputation, Carrier competes very favorably against other leading brands such as Goodman and Amana. MORE FROM LIFE123.COM Photo Courtesy: Tetra Images/Getty Images When the heat of summer is beating down, nothing takes the edge off like the refreshing chill of air conditioning. If you're one of the lucky Americans with central air conditioning in your home, you already know what a difference it makes to your comfort and state of mind in warm weather. But if that central air goes out or you move into a new place without it, it doesn't take long to realize fans and window-mounted AC units may not be enough to beat the heat. Many types of portable air conditioners can provide a temporary solution, but the best long-term answer for creating a cool, comfortable home is to install an air conditioning system. Here's a look at the specs, features, energy efficiency ratings, noise output and warranties for some of the best-rated home air conditioners on the market. Goodman Central HVAC Systems Goodman is a highly efficient and respected heating, ventilation and air conditioning (HVAC) brand. The company's central air units come with variable-speed ECM condenser fan motors that ensure quiet performance, especially when paired with high-density foam sound blankets to muffle compressor noises. The units come with a lifetime limited warranty on the compressors and a 10-year limited warranty on other parts. The Seasonal Energy Efficiency Ratio (SEER) of Goodman units range from 13 to 19 — industry ratings typically range from 13 to 26 — making these units solid performers at a mid-level price point. Photo Courtesy: Goodman Some air conditioner models, including the Goodman DSXC18, have a two-stage Copeland scroll compressor and built-in diagnostics. Compatibility with Goodman's ComfortNet system allows you to monitor the system for issues and display the results on the diagnostic touchscreen. It also lets you auto-configure the airflow and operating characteristics based on the indoor and outdoor components of the system. Amana Central HVAC Systems Like Goodman air conditioners, Amana air conditioners offer limited lifetime warranties for unit replacement and 10-year limited warranties on parts. The HVAC systems feature a single-speed condenser fan motor and a factory-installed inline filter drier that helps protect the sensitive components from dirt and moisture. Copeland CoreSense Diagnostics constantly monitor the system to help you spot problems early and avoid system failures. Photo Courtesy: Amana The Amana brand also features a high-density foam compressor sound blanket to minimize noise levels. Models like the Amana AVXC20 take advantage of high energy-efficient scroll compressors to achieve up to the maximum SEER rating, with the average Amana HVAC system earning a 16.7 SEER rating. American Standard Central HVAC Systems American Standard has been cooling down homes for many years. Models such as the American Standard AccuComfort Variable Speed Platinum offer a 12-year limited compressor warranty and a 10-year limited coil warranty. The Spine Fin™ coil system and Duration™ compressor help minimize noise levels, achieving a 69.9 average decibel rating. Some models have as high as a 22 SEER rating and feature AccuComfort™ technology that controls the cooling system with extreme precision. Photo Courtesy: American Standard Trane Central HVAC Systems Once owned by the same parent company that makes American Standard air conditioners, Trane HVAC systems offer a 12-year limited compressor warranty and a 10-year limited coil warranty. The cost of these air conditioners can be more expensive than other models, but the company has a strong reputation for providing premium value that is worth every penny. Trane systems feature compressor sound insulators that reduce noise levels. Different models come with SEER ratings ranging from 14 to 20. Photo Courtesy: Trane Rheem Central HVAC Systems Rheem air conditioning units are regarded as some of the best HVAC systems on the market. They have an average SEER rating of 16.7, with upper level units ranging all the way up to 20. Systems are protected by a 10-year compressor and parts warranty. The cooling technology features a Two Stage Copeland Scroll™ UltraTech™ Compressor that aids in noise reduction. Additionally, the EcoNet™ and PlusOne™ features help owners control the temperature remotely. Photo Courtesy: Rheem Lennox Central HVAC Systems Lennox air conditioning units have the best reputation for energy efficiency. The company produces HVAC systems with a range of SEER ratings, all the way up to the maximum, and the efficiency levels of equipment exceed 98%. With its SilentComfort™ technology, Lennox air conditioners greatly reduce noise levels throughout your home. The patented Climate IQ Technology precisely controls the cooling, even during the hottest part of the day. Lennox units come with a 10-year limited warranty on both parts and the compressor. Photo Courtesy: Lennox York Central HVAC Systems If you're looking for a great warranty, York HVAC systems have you covered with a lifetime warranty on the compressor, a 10-year limited warranty on parts and a one-year warranty on labor. The systems are also budget-friendly and come with a patented QuietDrive™ System to minimize noise pollution. The different models vary in efficiency from 13 SEER to 21 SEER. Additionally, York AC units implement Charge Assurance™ to display the system's overall condition. This feature extends the lifespan of every unit by issuing reminders and warnings for proper maintenance. Photo Courtesy: York Ruud Central HVAC Systems Reliable and long-lasting, Ruud's Achiever series uses both scroll compressors and PSC fan motors to produce SEER ratings of 13 to 17. The compressor is covered by a lifetime warranty, while parts come with a 10-year limited warranty. The units feature a composite base pan designed to safeguard against corrosion and reduce operating noise. The EcoNet-enabled Ultra series boosts the SEER rating up to an impressive 20.5. Photo Courtesy: Ruud Carrier Central HVAC Systems Carrier HVAC systems are top-of-the-line air conditioners designed with strict quality standards. The top-tier Infinity 26 model comes with Greenspeed Intelligence that boosts the SEER rating all the way up to 26. Widely considered to be the quietest air conditioners, Carrier units have average noise levels that barely exceed 68 decibels. In fact, Carrier air conditioners feature Silencer System II™ to keep the operational noise volume low. Carrier air conditioners come with reasonable price tags and a 10-year limited warranty on the compressor and functional parts. Photo Courtesy: Carrier Bryant Preferred HVAC Systems In business for more than 100 years, Bryant Preferred air conditioning systems have SEER ratings that range all the way up to 26. The brand provides a 10-year warranty on both the compressors and functional parts. The patented AeroQuiet System II™ helps reduce noise when the system is running, and DuraGuard Plus protection helps increase the lifespan of units by protecting them from harsh weather. The interior parts include an aluminum fin coil and are also corrosion-resistant. Bryant Preferred HVAC systems tend to be more expensive than other models.
